### Overview

In 1950, there was a 17,000 acre wildfire in a forest in New Mexico. A young bear was burned, got rescued, and became a national symbol. Since then, Smokey Bear has reminded people to be careful with fire. Meanwhile, in 1964, Congress began setting aside wilderness areas where natural processes could continue to function with minimal human influence. Wildand fire is one of the processes that was prerserved. Come learn about Good Fire and Bad Fire as we celebrate the birthdays of Smokey Bear and the Wilderness Act through educational storytelling. Smokey and his friends hope to see you there!
